

追查迫害法輪功國際組織（追查國際）
World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

Investigation Recording 2019-014

Date: March 8, 2019 (+86-57455836149)

Subject(s): Doctor, Liver Transplant, East Division, Ningbo Medical Center LiHuili Hospital

Summary

1. We do more than 60 liver transplants each year.
2. We were No. 2 in terms of liver transplants in the whole province.
3. Now the First Affiliated Hospital of Zhejiang University School of Medicine is No.1 and the Second Affiliated Hospital is behind us.
4. In fast cases, it would be slightly over one month if you are lucky. But it could be two, three or four months, if you are not so lucky.
5. Investigator: Do you still have donors from Falun Gong Practitioners?
Doctor: No, no, no, we don't have that kind.
6. Director Lu Caide is in charge of this area.

Translation

Doctor: Hello! This is the Hepatobiliary Surgery.

Investigator: Hi. Is this Ningbo Medical Center LiHuili Hospital?

Doctor: Yes. This is Eastern Division, Ningbo Medical Center LiHuili Hospital.

Investigator: Is Director Lu Caide there?

Doctor: The Director is in the operating room now.

Investigator: I have a relative who wants to get a liver transplant. I want to ask him if you still do many liver transplants in this hospital?

Doctor: Generally speaking, we do more than 60 liver transplants each year.

Investigator: I know you used to be No. 2 in Zhejiang Province, is that right?

Doctor: Yes, yes.

Investigator: How about Zhejiang University School of Medicine?

Doctor: What?

Investigator: Zhejiang University?

Doctor: You mean Zhejiang University School of Medicine?

Investigator: Zhejiang University School of Medicine...

Doctor: Zhejiang University has two affiliated hospitals. The First Affiliated Hospital is the number one and the Second Affiliated Hospital is behind us.

Investigator: Oh, oh, that's the case. I want to know how long I need to wait for a liver transplant if I come.

Doctor: It's hard to say. It depends on your blood type. Then we will take a look at the blood type of the liver. Perhaps you can come to the outpatient clinic and ask Doctor Lu to take a look, and consult him about your case. I cannot explain these things clearly over the phone, right?

Investigator: Right. Because my relative lives abroad, he wants me to inquire about it first before he comes back to get a liver transplant done here, you know.

Doctor: Okay. Anyways, It would be more convenient if you can come to the clinic when you are available.

Investigator: Oh. So, I'd like to let the patient know what the shortest wait time would be to get it done at your place, approximately.

Doctor: In fast cases, it would be slightly over one month if you are lucky. But it could be two, three or four months, if you are not so lucky.

Investigator: Oh, it's like that. As for the liver sources, usually are those liver donors healthy? Are they all okay?

Doctor: Definitely. Yes, we can do the surgeries usually only when they (organs) are usable for sure, right? Otherwise it makes no sense to replace them. The organs all go through evaluations.

Investigator: As I heard from doctors in our place, the patients now--(their donors) were those who were almost dying. In the past, the donors were Falun Gong practitioners in the prisons.

Doctor: We don't have that kind, no, no. I suggest that you do some research first. We can only tell you our wait time. Anyway, as I've already told you, our hospital can do over 60 cases in a year. Any other questions?

Investigator: Okay, that's it. Thank you. Bye.

Doctor: Bye.
