

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

Investigation Recording 2019-134

Date: October 18, 2019 (+86-23-89012554)

Subject(s): Doctor, Kidney Transplant, the First Affiliated Hospital, Chongqing Medical University, Sichuan

Summary

1. It seems that we just did that yesterday, and the day before yesterday, but I don't know if we have any more of those surgeries to be done after that.
2. Director Liang Simin is a lead surgeon.
3. In fast cases, they (kidney organs) may become available tomorrow, but in slow cases, they may not show up even after the patients have waited for half a year or a year.

Translation

Investigator: Hello?

Doctor A: Hello!

Investigator: Hey, hello! How are you, Doctor? Is this the First Affiliated Hospital of Chongqing Medical University? My relative wants to go to your hospital for a kidney transplant.

Doctor A: Wait a minute!

Investigator: Okay, thank you.

Doctor A: Wait a minute!

(Transferring the phone to the other doctor)

Doctor B: Hello!

Investigator: Hey, hello! My relative wants to go to your place for a kidney transplant. Shall we bring all the materials over, or shall we also bring the patient over, and transfer to your hospital?

Doctor B: Oh, that means you haven't been to our hospital yet, have you?

Investigator: No, we haven't. But someone recommended Director Liang at your place, saying that he does a fairly good job, and we'd better transfer to your hospital. So I'd like to ask some questions to learn about your place. If it's okay, then we will come over.

Doctor B: In that case, you may have to wait!

Investigator: Do you do it every week? You have patients every week?

Doctor B: Ah, it seems that we just did that yesterday, and the day before yesterday, but I don't know if we have any more cases to be done after that.

Investigator: Ah, in that case, so, your Director Liang, Director Liang Simin is a lead surgeon, is he?

Doctor B: Yes, yes, he is the one who does the surgeries.

Investigator: Ah, so, if we come, and if the tissue typing is done successfully, you can have a vacant bed available for our patient?

Doctor B: Uh, if the tissue typing is successful, we will be able to arrange a bed for you by then, because usually that means you're actually ready for the operation.

Investigator: Ah, so I just would like to ask how long the wait time would be in the fastest case, and in the slowest case? As I've heard, the wait time might be a few months in the slowest case, and in the fastest case, it might be two weeks, or one week.

Doctor B: For such things as the kidney sources, sometimes it depends on luck. In fast cases, they may become available tomorrow, but in slow cases, they may not show up even after the patients have waited for half a year or a year.

Investigator: Got it, so, we'll have to bring all the files to get on your waiting list, and make an appointment with Director Liang, right?

Doctor B: You have to contact us first. You can get hospitalized when a match is found.

Investigator: Yes, as I have checked online, the clinic schedule is available there. So I'll need to contact him, right?

Doctor B: They come to the clinic on Tuesdays only, every Tuesday.

Investigator: On Tuesdays?

Doctor B: Yes.

Investigator: Okay, well, thank you! Thank you.

Doctor B: Okay, okay, okay.
