

423 WOIPFG Releases the List of 7, 423 Medical Personnel Suspected of Harvesting Organs from Living Falun Gong Practitioners in 788 Hospitals Nationwide Outside of Chinese Military Scope

July 10, 2016

Overview

Investigations conducted by World Organization to Investigate the Persecution of Falun Gong (WOIPFG) on medical institutions not belonged to military scope in all the 22 provinces, 5 autonomous regions, and 4 municipalities throughout China indicate that, the year 1999 marked a significant watershed. Before 1999, the number of units performing human organ transplantation and the number of transplants they carried out were both very small, while after 1999, both numbers spiked rapidly. According to the incomplete statistics WOIPFG has compiled, at least 788 civilian medical institutions started conducting organ transplantation after 1999, among them were a considerable number of hospitals of traditional Chinese medicine (TCM), forensic hospitals, children’s hospitals, county-level hospitals, and specialist hospitals. The time during which the number of organ transplants spiked highly coincides with the time duration when the Chinese Communist Party (CCP) had been illegally abducting and detaining Falun Gong practitioners. This report releases the list of 7, 423 medical personnel suspected of harvesting organs from living Falun Gong practitioners in 788 Chinese civilian medical institutions. Along with the list of 2, 096 medical personnel in 103 Chinese Military and Armed Police Force hospitals suspected of harvesting organs from living Falun Gong practitioners released on July 10, 2016, at least 9, 519 medical personnel in 891 Chinese medical institutions are suspected of harvesting organs from living Falun Gong practitioners for transplantation (while some other hospitals being investigated).

Geographical distribution – locations of 865 Chinese medical institutions suspected of harvesting organs from living Falun Gong practitioners for transplantation (December 26, 2014, <http://goo.gl/jyV96Q>)

追查迫害法輪功國際組織

World Organization to Investigate the Persecution of Falun Gong

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

WOIPFG herein lists below the abnormalities regarding the organ transplantation performed at the above 788 hospitals and presents specific examples.

1. Civilian hospitals have conducted as many as 24 different types of organ transplantation, which amounts to an exceedingly large number of cases

To date, WOIPFG has made effort on obtaining access to the overall situation of organ transplantation at the 788 Chinese civilian medical institutions in the 22 provinces, 5 autonomous regions, 4 municipalities, and 217 prefectural-level cities throughout China. According to the incomplete statistics compiled from the publicly available data, these hospitals conducted altogether 114,098 cases of kidney transplantation, 27,603 cases of liver transplantation, 1,713 cases of heart transplantation, 503 cases of lung transplantation, 145,058 cases of corneal transplantation, 450 cases of combined liver-kidney transplantation, 286 cases of combined pancreas-kidney transplantation, 41 cases of combined heart-lung transplantation, 6 cases of combined heart-kidney transplantation, 5 cases of testicular transplantation, 6 cases of intestinal transplantation, 7 cases of combined liver-pancreas-duodenal transplantation, 4 cases of combined pancreas-duodenum-kidney transplantation, 1 case of combined liver-pancreas transplantation, 7 cases of pancreas transplantation, 2 cases of liver-intestinal transplantation, 4 cases of combined islet cell-kidney transplantation, 1 case of parathyroid transplantation, 1 case of combined thyroid-parathyroid-thymus transplantation, 1 case of adrenal transplantation, 6 cases of spleen transplantation, 1 case of upper abdominal organ cluster transplantation, 2 cases of combined seven-abdominal organ transplantation, 1 case of combined eight-abdominal organ transplantation.

Up to July 10, 2016, at least 891 medical institutions in China are suspected of harvesting organs from living Falun Gong practitioners being along with the list published by WOIPFG on July 10, 2016, of those medical personnel at 103 Chinese military and Armed Police Force hospitals. At least 177,101 cases of kidney transplantation, 40,321 cases of liver transplantation, 1,928 cases of heart transplantation, and 152,799 cases of corneal transplantation have been performed at these hospitals.

The above statistics came from the Hospital websites and the papers published in Chinese medical journals. The published materials only reported a small portion of the total number of transplants conducted, and covered only a certain limited period of time, respectively. The exact numbers of transplants conducted at a considerable portion of the Hospitals cannot be incorporated into the total number. Therefore, the data presented in the report fall far short of the actual figures.

2. Many hospitals conducted transplants of an exceedingly large total number

The Organ Transplant Center at the First Affiliated Hospital, Sun Yat-sen University had conducted over 4,000 cases of kidney transplantation till December 2013¹. The Center also performed over 1,500 cases of liver transplantation as well as over 40 cases of upper abdominal organ cluster transplantation (liver-pancreas cluster), combined liver-kidney transplantation, and combined pancreas-kidney transplantation².

Tianjin First Central Hospital conducted 500 cases of liver transplantation and over 300 cases of kidney transplantation in 2004³. A total of 647 cases of orthotopic liver transplantation, 436 cases of kidney transplantation, 21 cases of combined liver-kidney transplantation, and 2 cases of combined pancreas-kidney transplantation in 2005⁴. A total of 676 cases of liver transplantation were conducted at the Hospital in 2006⁵. According to China Liver Transplant Registry (CLTR), Zhongyang Shen had led the transplant teams at Tianjin First Center Hospital as well as at the General Hospital of Armed Police Force to conduct at least 6,270 cases of liver transplantation by the end of 2010⁶.

Zhongshan Ophthalmic Center, Sun Yat-sen University has performed over 40,000 cases of corneal transplantation and superficial ocular operations up to present⁷.

追查迫害法輪功國際組織

World Organization to Investigate the Persecution of Falun Gong

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

The First Affiliated Hospital of Xi'an Jiaotong University had conducted 3,764 cases of kidney transplantation by December 2013⁸. The Hospital had supervised over 10,000 cases of kidney transplantation performed at 23 hospitals in 13 provincial cities by December 2012⁹.

3. Numbers of transplants conducted at many hospitals increased dramatically after 1999

The First Affiliated Hospital of Wenzhou Medical University (also known as The First Provincial Wenzhou Hospital of Zhejiang) set up the Department of Organ Transplantation¹⁰ and the Tissue Typing Laboratory¹¹. It was claimed in the Hospital's introduction that 375 cases of kidney transplantation had been performed from 1985 to 2000, averaging out to 25 cases per year. In 2006, the Hospital claimed over 100 cases of kidney transplantation had been performed annually¹². Over 1,600 cases/times^{13,14} of allogeneic kidney transplantation had been carried out by 2012.

The First Affiliated Hospital, Zhejiang University conducted 2 cases of orthotopic liver transplantation during 1993 to 1997¹⁵. After 1999 the number of transplants conducted at the Hospital spiked rapidly. The Hospital had conducted 1,521 cases of liver transplantation by July 8, 2014¹⁶. The Hospital conducted 898 cases of kidney transplantation during July 1977 to December 1999, averaging out to 40 cases per year¹⁷. But over 3,300 cases of kidney transplantation had been conducted in this hospital by May 2012, averaging out to 280 cases of kidney transplantation per year¹⁸, 7 times the number of kidney transplants before 1999.

In May 1994, Zhongyang Shen performed the first case of liver transplantation at Tianjin First Central Hospital based on the record. Only 5 to 8 cases of liver transplantation had been ever performed in the following 3 to 5 years at that hospital¹⁹. After 1999, the number of liver transplants conducted at the same institute dramatically increased - the Orient Organ Transplant Center within the hospital had conducted 2,248 cases of liver transplantation by 2004, and had conducted on average over 300 cases of kidney transplantation plus 600 cases of liver transplantation per year. The Division of Transplantation at the hospital also supervised the liver transplantation conducted in nearly 47 medical units of 16 provinces, and assisted with over 300 cases of liver transplantation at other hospitals²⁰.

There is another example- Shanghai General Hospital conducted 1,120 cases of kidney transplantation from 1978 to June 2000, averaging out to 50 cases of kidney transplantation per year²¹. However, the Hospital conducted altogether 767 cases of kidney transplantation, 456 cases of liver transplantation as well as in total 1,501 cases of bone marrow transplantation, heart transplantation, lung transplantation, combined liver-kidney transplantation, combined pancreas-kidney transplantation, and corneal transplantation from 2001 to the end of 2005²². On the average 153 cases of kidney transplantation were conducted per year.

4. Most of the listed hospitals set up "organ transplant center" after 1999

Zhongshan Hospital, Fudan University established the Organ Transplant Center on October 30, 2001²³. The center conducts over 100 organ transplants annually and the number of transplants is increasing by 50% every year. On December 8, 2003, the Organ Transplant Center of Zhongshan Hospital joined with the largest organ transplant institute in the world to establish the "Cooperation Center for Zhongshan Hospital and Thomas E. Starzl Transplantation Institute (STI), University of Pittsburgh"²⁴. Professor John J. Fung, U.S. Director of this Sino-American Cooperation Center, even did a demonstration of operation in an operating room of Zhongshan Hospital for his colleagues from all over China²⁵. Nearly 1,000 cases of kidney transplantation, over 200 cases of liver transplantation, 107 cases of heart transplantation, 6 cases of combined heart-lung transplantation, and 11 cases of combined liver-kidney transplantation altogether had been conducted in Zhongshan Hospital by 2004; the number of organ transplants grows rapidly every year²⁶.

The Third Affiliated Hospital, Sun Yat-sen University started applying clinically and promoting liver transplantation in 1999²⁷. The Hospital conducted over 200 cases of liver transplantation merely from January to November 2004²⁸, and 843 cases of liver transplantation from April 2001 to July 2006²⁹. The Hospital performed 232 cases of combined liver-kidney extractions for transplantation from "donors" aged 18-35 during the period from January 2008 to June 2009³⁰.

World Organization to Investigate the Persecution of Falun Gong

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

The Ministry of Health of the PRC organized for discussion some experts and professionals in relevant fields of transplantation medicine and approved afterwards that Research Center of Chinese Health Ministry on Transplantation Medicine Engineering and Technology be established at the Third Xiangya Hospital of Central South University (hereafter “the Center”) in 2005. The Center conducted several hundred cases of piggyback liver transplantation and over 1, 000 cases of kidney transplantation after 3 years of development. Further, the Center also conducted combined liver-kidney, liver-pancreas, liver-intestinal, pancreas-kidney, and multi-organ transplantation as well as spleen transplantation, pancreas transplantation, heart transplantation, splitting liver transplantation, related-“donor” liver transplantation, combined thyroid-parathyroid transplantation, liver cell transplantation, spleen cell transplantation, and pancreatic cell transplantation³¹.

The Institute of Organ Transplant, Peking University (hereafter “the Institute”), formerly known as the Center of Organ Transplant, Peking University (hereafter “the Center”), was established in October 2001 under the personal supervision of Qide Han, Vice Chairperson of the 11th Standing Committee of National People’s Congress. The Institute was jointly established by 5 hospitals affiliated to Peking University, including Peking University First Hospital, People’s Hospital, and Third Hospital, Peking University. The Institute conducted liver transplantation, kidney transplantation, pancreas transplantation, heart transplantation, corneal transplantation and bone marrow transplantation. The Institute had conducted altogether over 900 cases of liver transplantation and nearly 2, 000 cases of kidney transplantation by December 2013³² [32].

Longkai Peng, Associate Director of Organ Transplant Center and Director of Department of Urinary Surgery and Organ Transplantation at the Second Xiangya Hospital of Central South University (former called Second Affiliated Hospital of Hunan Medical University), has taken charge of the kidney transplantation at the Hospital since 2002. Within only 6 months the Hospital conducted more kidney transplants than it did during all the past years³³. From its establishment year 2003 to 2010, the Department of Urinary Surgery and Organ Transplantation jointly performed over 1, 000 cases of allogeneic kidney transplantation³⁴.

Guangdong No. 2 Provincial People’s Hospital established the Department of Organ Transplantation in 1999. The Department administers the Organ Transplant Area, the Hemodialysis Area, and the Organ Transplant Laboratory; the Department conducts over 100 cases of kidney transplantation annually³⁵.

Department of Liver and Vascular Surgery in West China Hospital, Sichuan University started conducting liver transplantation in 1999³⁶. The Hospital had performed 1, 000 cases of liver transplantation by 2013³⁷.

5. Many hospitals established organ transplant centers after 1999 although they failed to pass the qualification review by the Ministry of Health of the P.R.C. in 2007

Laixi No. 2 People’s Hospital is a Class Two general hospital³⁸. The Hospital and Oriental Trading Company from Canada established a kidney transplant center as their joint venture in 2001³⁹. The Hospital conducted over 100 cases of kidney transplantation over the years⁴⁰.

Tangshan Kidney Transplant Dialysis Center had conducted over 100 cases of allogeneic kidney transplantation within 3 years since its establishment in August 2000, and repeatedly performed kidney transplants in batches.

6. Many hospitals of traditional Chinese medicine (TCM) started conducting organ transplantation after 1999

South China Organ Transplant Center was established under the Fourth Surgery Department at Guangdong Provincial Hospital of Chinese Medicine on April 12, 2004. Since establishment, the Center not only had performed standard liver transplantation, kidney transplantation, and pancreas transplantation but also planned to conduct heart transplantation. Within less than two years, the Center conducted 1 case of combined liver-kidney transplantation, over 20 cases of liver transplantation, and over 50 cases of kidney transplantation⁴¹.

追查迫害法輪功國際組織

World Organization to Investigate the Persecution of Falun Gong

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

Dongyang Hospital of Traditional Chinese Medicine (Zhejiang province) is a Class Three Grade B hospital of TCM⁴². The Hospital started conducting kidney transplantation in 2001⁴³, and currently has over 100 kidney transplant patients receiving postoperative care⁴⁴.

Department of Urinary Surgery, Jiangsu Province Hospital of TCM has conducted kidney transplantation since October 2003⁴⁵ and conducts about 60 cases of kidney transplantation every year. The Hospital also conducted liver transplantation⁴⁶.

Gongyi City Hospital (in Henan province) set up a Kidney Transplant Center in 2001⁴⁷. The Center can receive 12 kidney transplant recipients simultaneously and conduct at most 8 cases of kidney transplantation in one day. Hongdao Li, Director of Department of Urinary Surgery at the hospital, has conducted over 500 cases of allogeneic kidney transplantation⁴⁸.

7. Many hospitals at county level started conducting organ transplantation after 1999

Shuyang People's Hospital is a Grade B hospital in northern Jiangsu; it independently conducted allogeneic kidney transplantation and corneal transplantation⁴⁹. The Hospital performed the first case of allogeneic kidney transplantation on September 16, 2004⁵⁰. Shangguo Chen, Director of Department of Urology, conducted 3 cases of allogeneic kidney transplantation in less than one year after he joined the Hospital⁵¹.

Gong An County People's Hospital is a Class Three general hospital⁵². The Hospital's Department of Urinary Surgery has conducted over 100 cases of kidney transplantation⁵³.

8. Many children hospitals as well as maternal and child health hospitals started conducting organ transplantation after 1999.

Dayue Li, Director of Department of Urology at Linzi District Maternal and Child Health Hospital of Zibo City (also known as Qidu Hospital)⁵⁴, conducted as chief operating surgeon over 300 cases of kidney transplantation⁵⁵.

Children's Hospital of Chongqing Medical University has conducted liver transplantation since 2006⁵⁶. The Hospital had conducted 59 cases of children's liver transplantation by the end of May 2014⁵⁷.

Changzhou Children's Hospital of Jiangsu Province started conducting allogeneic orthotopic liver transplantation in 2005⁵⁸.

Department of Urinary Surgery at Nanjing Children's Hospital conducted kidney transplantation⁵⁹. The Hospital conducted the first case of heart transplantation in Jiangsu province in August 2000⁶⁰.

9. Forensic hospitals participated in performing organ transplantation and tissue typing

The Key Laboratory of Forensic Sciences was established by Department of Forensic Sciences, Xi'an Jiaotong University upon approval by Department of Medical Science, Technology and Education under the Ministry of Health of P.R.C in October 1999. The Laboratory was jointly established by the Ministry of Health, the Ministry of Public Security, and the Supreme People's Court of the P.R.C. The Laboratory claimed that the research it made on organ transplantation and tissue typing was state-of-the-art⁶¹.

Center of Paternity Testing Center (Forensic Evidence Room), Kunming Forensic Hospital completed several thousand cases of tissue typing for organ transplantation from 2001 to 2008⁶². The Hospital had conducted 1, 537 cases of kidney transplantation in cooperation with Center for Blood Purification and Organ Transplant at Taiping People's Hospital of Dongguan (now Dongguan Fifth People's Hospital) by April 2008⁶³.

10. Many hospitals failed to pass the qualification review by the Ministry of Health of P.R.C. in 2007 but still started regularly conducting kidney transplantation and corneal transplantation

The Central Hospital of Yongzhou (formerly known as “Yongzhou People’s Hospital, Hunan Province”) established “Yongzhou Kidney Transplant Center” in 1999⁶⁴. The Hospital claimed that it could regularly conduct kidney transplantation and corneal transplantation⁶⁵.

The Department of Urinary Surgery at the First Affiliated Hospital of Wannan Medical College (also known as “Yijishan Hospital”) claimed that it could conduct kidney transplantation and has regularly conducted kidney transplantation in recent two years⁶⁶. The Hospital claimed to have conducted transplantations of other organs, such as bone marrow transplantation, corneal transplantation, and heart transplantation, on the basis of liver transplantation and kidney transplantation that were already performed⁶⁷.

The Second Affiliated Hospital of Nanchang University claimed to have regularly taken various approaches to corneal transplantation; the Hospital has conducted over 5, 000 cases of various types of corneal transplantation to date⁶⁸.

11. Many hospitals conduct transplant operations in batches on different operating tables simultaneously.

Dongfeng General Hospital simultaneously conducted 10 cases of kidney transplantation, 1 case of parathyroid transplantation, and 3 cases of corneal transplantation on the same day in August 2000⁶⁹.

Qingshan Qu, Director of Center for Kidney Diseases and Organ Transplant at People’s Hospital of Zhengzhou, completed 13 cases of kidney transplantation leading a group within 21 hours on December 27, 2007⁷⁰.

The Department of Urology of the First People’s Hospital of Foshan conducted 7 cases of kidney transplantation simultaneously on December 29, 2005⁷¹. Moreover, the Hospital conducted 5 cases of kidney transplantation and 2 cases of liver transplantation within less than 24 hours, from the morning of December 28 to the daybreak of December 29, 2004⁷².

Shengli Oilfield Central Hospital conducted 6 cases of kidney transplantation within 24 hours on April 26, 2002; the Hospital conducted 5 cases of kidney transplantation and 1 case of liver transplantation again within 24 hours on October 27, 2002; the Hospital conducted 10 cases of kidney transplantation and 1 case of liver transplantation within 3 days from January 9 to January 12, 2004⁷³.

The First Affiliated Hospital of Nanchang University set the record of simultaneously conducting 6 cases of major organ transplantation on the same day⁷⁴. The Hospital claimed that Jianzhu Meng, Secretary of Provincial Party Committee, had been quite concerned with and supportive of the Hospital’s organ transplant business. Meng personally pulled strings to form alliance and foster cooperation between the hospital with Shanghai Organ Transplantation Center (in Shanghai First People’s Hospital)⁷⁵.

Xiangya Hospital, Central South University even conducted 17 cases of organ transplantation in one day on April 28, 2006, including 7 terminal uremia patients receiving kidney transplantation simultaneously, as well as 2 cases of liver transplantation and 8 cases of corneal transplantation completed on the same day⁷⁶.

According to *Guangzhou Daily* of March 14, 2006, a reporter witnessed 5 liver transplants and 6 kidney transplants being conducted simultaneously in operating rooms at the First Affiliated Hospital, Sun Yat-sen University. The reporter also mentioned the Hospital performed as many as 19 cases of kidney transplantation in one day; the maximum record for liver transplant is 6 cases of liver transplantation and 1 case of multi-organ transplantation in one day⁷⁷.

追查迫害法輪功國際組織

World Organization to Investigate the Persecution of Falun Gong

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

According to *Tianjin Channel Xinhua Net* of February 7, 2005, Orient Organ Transplantation Center, Tianjin First Center Hospital conducted 108 cases of liver transplantation (averaged by 5 workdays per week, 4 to 5 cases of liver transplantation done per workday), and 43 cases of kidney transplantation within merely the first month of 2005⁷⁸.

12. The hospitals generally claim abundant supplies of “donor” organs

The Department of Ophthalmology at the First People’s Hospital of Changde claimed it regularly conducted corneal transplantation and had adequate sources of corneas⁷⁹.

Weifang Eye Hospital claimed its eye bank was accredited as a standard eye bank for Weifang City by Shangdong Provincial Department of Health at the end of 2007, and has provided adequate corneas for corneal transplant patients. The Hospital had performed several thousand cases since it started conducting corneal transplantation in 1999⁸⁰.

The Department of Kidney Transplantation at Yiyang People’s Hospital stated, “We have built close coordination and cooperation with the General Hospital of People’s Liberation Army (PLA) and Kidney Transplant Center at the Affiliated Hospital of First Military Medical University; we select the best kidneys; we do a comprehensive and strict checkup on the kidneys from ‘donors’ beforehand to ensure the optimal quality and result of organs from ‘donors’ and tissue typing⁸¹.” The Hospital had performed 118 cases of kidney transplantation from September 2002 to September 2006⁸².

The Kidney Transplant Center at the Third People’s Hospital of Changde claimed to have strong support from the government. The Center conducts 50-100 cases of kidney transplantation annually and has stable and reliable “donor” kidney supplies⁸³.

13. The hospitals generally claim extremely short wait times for “donor” organs and are able to perform emergency organ transplantation

Department of Liver Transplantation and Department of Hepato-Biliary-Pancreatic Surgery at the People’s Hospital of Zhengzhou currently performs nearly 100 cases of liver transplantation per year, and cures over 20 cases of acute liver failure with emergency liver transplantation per year⁸⁴.

Department of Hepato-Biliary-Pancreatic Surgery at the First Affiliated Hospital, Zhejiang University conducted 46 cases of emergency liver transplantation from January 2000 to December 2004. All of the above patients received orthotopic liver transplantation within 72 hours⁸⁵. The Department is also designated by the Ministry of Health as Key Laboratory of Multi-Organ Combined Transplantation.

14. Organ transplantation is a highly lucrative business for transplant hospitals

Xi’an Gaoxin Hospital claimed that its departments conducted altogether 232 cases of allogeneic kidney transplantation and over 30 cases of allogeneic liver transplantation within 5 years since its establishment from 2002 to 2007. Thus, Department of Urinary Surgery at Xi’an Gaoxin Hospital made revenues of more than RMB 10 million yuan. This amount greatly exceeds the total revenues made by all then Class-Three-Grade-A hospitals in Xi’an and may well stand comparison with those made by Department of Urinary Surgery at the First Affiliated Hospital of Xi’an Jiaotong University and Xijing Hospital of the Fourth Military Medical University⁸⁶.

List of Suspects Under Investigation

Chinese medical personnel involved in organ harvesting from living Falun Gong practitioners, include but are not limited to: doctors specializing in organ extraction and transplantation, nurses, and anesthetists. Fundamental medical ethics and international regulations on organ donation maintain that these medical personnel, prior to presenting

City of Beijing (北京市)

Up to 2014, WOIPFG has acquired general information regarding organ transplantation at 29 hospitals in City of Beijing. According to incomplete statistics based on the released information, these hospitals have performed at least 12, 940 cases of kidney transplantation, 2, 484 cases of liver transplantation, 645 cases of heart transplantation, 44 cases of pulmonary transplantation, 9, 585 cases of corneal transplantation, at least 1 case of heart-lung transplantation, at least 45 cases of pancreas- kidney transplantation, at least 1 case of liver- kidney transplantation. WOIPFG hereby releases the list of 533 medical personnel of 30 hospitals in Beijing subject to investigation.

1. Peking Union Medical College Hospital (北京协和医院)

Overview: This is a “Class Three Grade A” general hospital⁸⁷, which was accredited to conduct liver transplantation and kidney transplantation by the Ministry of Health of the PRC on May 23, 2007⁸⁸. Approximately 1, 000 cases of kidney transplantation had been conducted at the Hospital up to present⁸⁹.

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Cases conducted/Department: Department of Hepatobiliary Surgery			
	HUANG Jiefu (黄洁夫)	Chief Physician, Professor, Director, Department of Liver Surgery, Peking Union Medical College Hospital; Former President, Sun Yat-sen University; Former Deputy Minister of Health, The State Council, PRC; (current) Associate Director, and member of Expert Group, the Central Healthcare Committee for Central Committee of the CPC; Director, China Organ Donation and Transplant Committee, National Health and Family Planning Commission of the PRC	Performed over 500 cases of liver transplantation only in the year of 2012; Participated in performing at least 340 cases of liver transplantation until April 2006.

3. Beijing Chao-Yang Hospital Capital Medical University (北京朝阳医院)

Overview: This is a “Class Three Grade A” hospital⁹⁴, which was accredited to conduct liver, kidney, and lung transplantation by the Ministry of Health of the PRC on May 23, 2007⁹⁵.

Kidney transplantation: The first case of combined pancreas-kidney transplantation in China was conducted at the Hospital in 1999. To date, over 3,000 cases of kidney transplantation⁹⁶ have been conducted. Respectively 269 cases, 303 cases, and 348 cases of kidney transplantation were conducted at the Hospital in 1998, 1999 and 2000; the Hospital therefore ranked first in the number of kidney transplants completed in China for three consecutive years. In December 2006, the number of kidney transplants performed in this hospital exceeded 2,000⁹⁷;

Liver transplantation: The first case of liver transplantation in Beijing was conducted at the Hospital in July 1999. To date, over 500 cases of liver transplantation have been conducted⁹⁸;

Heart transplantation: The Hospital first started performing heart transplantation in July 2001, and 2 cases of orthotopic heart transplantation were conducted at the time⁹⁹;

Lung transplantation: The Hospital first started performing lung transplantation in 2005¹⁰⁰; 28 cases of lung transplantation were conducted on patients with end-stage lung diseases as treatment during August 2005 to December 2010, among which 13 cases of double lung transplantation and 15 cases of single lung transplantation¹⁰¹;

Combined transplantation: 15 cases of combined pancreas-kidney transplantation were conducted during February 1997 to December 2001¹⁰²;

Corneal transplantation: Penetrating keratoplasty, lamellar keratoplasty, corneal transplantation, cataract ultrasonic emulsification, and combined operations of artificial lens implantation were conducted by Department of Ophthalmology¹⁰³.

15. Beijing Aerospace Central Hospital (北京市航天中心医院)

Overview: This is a “Class Three” hospital¹⁶⁴, which was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health of the PRC in 2007. The Urology Clinic started conducting kidney transplantation. The hospital claimed to have completed nearly 100 cases of liver transplantation and kidney transplantation within several years¹⁶⁵. The Urology Clinic consisted of four specialist departments, namely Urology, Organ Transplantation, Nephrology, and Hemodialysis. The Hospital claimed to have conducted 114 cases of kidney transplantation and 11 cases of liver transplantation until 2006¹⁶⁶. Its Department of Urology conducts kidney transplantation, works closely with, and shares the experts among The Chinese People’s Liberation Army General Hospital, Peking University First Hospital, Peking University Third Hospital, Beijing Chao-Yang Hospital, Beijing Cancer Hospital, and Peking Union Medical College Hospital¹⁶⁷.

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Cases conducted/Department: 114 accumulated cases of kidney transplantation, conducted by the end of 2006.			
	ZHANG Yuhai (张玉海)	Chief Physician, Director, The Urology Clinic, Beijing Aerospace Central Hospital; President, Beijing Society of Organ Transplantation; Vice President, Chinese Society of Organ Transplantation, The Chinese Medical Association (CMA)	Performed 2, 600 cases/times of kidney transplantation doing as chief of a group.

26. Beijing Minzhong Eye Hospital
(北京民众眼科医院)

Overview: This was established in accordance with the “Class Three Grade A” level to have medical services, research, education function together being as an ophthalmology specialized hospital¹⁸⁹. It was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health of the PRC in 2007. In three years’ time, 186 patients with corneal blindness from 26 provinces in China received corneal transplantation at the Hospital, which also had an eye bank established, and a team specializing in treating diseases of the corneals and ocular surface. Its Department of Laboratory Medicine can perform various examinations relevant to the above transplant operations, such as immunological tests relevant to the detection of HLA antibodies, HLA or tissue type matching, and tissue transplantation. Department of Laboratory Medicine can also perform examinations detecting the plasma concentration of an immunosuppressive agent¹⁹⁰.

City of Tianjin

(天津市)

As of 2014, WOIPFG has acquired general information regarding organ transplantation at 13 hospitals in City of Tianjin. According to incomplete statistics based on the released information, these hospitals have performed a very big amount of transplantation including Tianjin First Central Hospital with hosting so called “the largest transplant center in Asia” from 2003, Orient Organ Transplant Center that had carried out more than 4, 770 cases of liver transplantation up to 2010 in this only one institute led by Zhongyang Shen. This hospital even can combinedly perform liver, kidney, pancreas, intestine, and heart transplants. In addition, it has assisted 66 medical units in 22 regions in developing clinical liver transplant procedures, which account for two-third of all liver transplant facilities in China. According to China Liver Transplant Registry (CLTR) report, as of the end of 2010, Tianjin First Central Hospital and the Armed Police General Hospital transplant teams, also led by Zhongyang Shen, have performed a total of 6, 270 cases of liver transplantation, occupying 30.2% of cases nationwide. In addition, it has assisted 66 medical units in 22

regions in developing clinical liver transplant procedures, which account for two-third of all liver transplant facilities in China. (And it has been showed that the later institute had furtherly carried out more than 117 cases of liver transplantation, more than 300 cases of kidney transplantation up to March 2012, even with the number of at least 400 for liver transplantation, at least 300 for kidney transplantation, at least 20 for combined liver-kidney transplantation, and 8 for pancreas-kidney transplantation added in the record up to May 2014.)

Some of other evidence for Tianjin included at least 3, 214 cases of kidney transplantation, 65 cases of heart transplantation, 2 cases of pulmonary transplantation, 1, 480 cases of corneal transplantation, 1 case of combined heart-kidney transplantation, 40 cases of pancreas-kidney transplantation, 70 case of liver-kidney transplantation performed. WOIPFG hereby releases the list of 187 medical personnel of 13 hospitals in Tianjin subject to investigation.

31. Tianjin First Central Hospital (天津第一中心医院)

Overview: This is a “Class Three Grade A” general hospital specialized in organ transplants¹⁹⁸ which was accredited to conduct liver, and kidney transplants by the Ministry of Health of the PRC on May 23, 2007¹⁹⁹. The Organ Transplant Department of the hospital was set up by Shen Zhongyan in 1998. In 2002, the Institute of Organ Transplantation of Tianjin, then in 2003 Orient Organ Transplant Center was founded²⁰⁰. It provides services that include transplant surgeries, transplant medicines, transplant ICU, transplant follow-ups, anesthesia, imaging, pathology, ultrasound, transplant laboratories and other departments. It has the largest professional transplant team in China and also the largest transplant center in Asia which can combinedly conduct liver²⁰¹, kidney^{202, 203}, pancreas, intestine, combined transplantation^{204, 205}, heart transplantation, lung transplantation, and corneal transplantation.

Liver transplantation: 6, 270 cases had been conducted under the direction of Shen Zhongyang according to a report from China Liver Transplant Registry (CLTR) as of 2010, comprising 30.2% of the total amount nationwide; It has assisted 66 medical units in 22 regions in developing clinical liver transplant procedures, which account for two-third of all liver transplant facilities in China; 676 cases, conducted in 2006;

Kidney transplantation: 2, 572 cases, performed during October 1998 to December 2011; In 2004, a breakthrough of 500 cases of liver and 300 cases of kidney transplantation were conducted, which were the highest in China as well as in the world; In 2004, a breakthrough of 500 cases of liver and 300 cases of kidney transplantation were conducted, which were the highest in China as well as in the world;

Multiple organ transplantation: 21 cases of combined liver-kidneys transplantation and 2 cases of combined pancreas-kidney transplantation were conducted in 2005;

Heart transplantation: 7 cases, conducted during September 2006 to August 2007²⁰⁶; On May 19, 2011, 1 case was conducted²⁰⁷; In September 2013, 2 cases of heart transplantation were conducted²⁰⁸;

Lung transplantation: The first case conducted in Tianjin City of lung transplantation were conducted in July 2006; Within a short period of four months, the patient received a single (left) lung as well as a double lung transplantation²⁰⁹;

Corneal transplantation: 25 cases conducted, during May 2010 to May 2011²¹⁰; According to the hospital, corneal transplant surgeries have helped many patients restore their vision²¹¹.

33. International Cardiovascular Hospital (泰达国际心血管医院 TEDA)

Overview: This is a “Class Three Grade A” hospital specialized in cardiovascular diseases²¹⁷. It was accredited to conduct heart transplantation by the National Health and Family Planning Commission of the PRC on August 1, 2013²¹⁸. The Department of Cardiac Surgery claimed it was of a pioneer in Tianjin to conduct heart and combined heart-kidney transplantation²¹⁹. Over 10 cases of combined heart-kidney transplantation and heart transplantation as well as the peri-operation management had been performed since 2005²²⁰.

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Cases conducted/Department: Over 10 cases of of combined heart-kidney transplantation and heart transplantation, conducted since 2005.			
	LIU Xiaocheng (刘晓程)	Chief Physician, Professor, Department of Cardiovascular Surgery, President, Taida International Cardiovascular Disease Hospital	Took charge of 8 cases of heart transplantation conduction in hospital; Participated in performing extraction of hearts for 6 cases of orthotopic heart transplantation from brain-dead "donors" (male, age 27-35 yrs) during April 2006 to November 2007.
	LIU Zhigang (刘志刚)	Chief Physician, Department of Cardiovascular Surgery, Deputy President, Taida International Cardiovascular Disease Hospital	Participated in performing heart transplantation (number of cases, to be investigated).
	JING Wenbin (靖文斌)	Chief Physician, Director, Department of Cardiovascular Surgery, Taida International Cardiovascular Disease Hospital	Participated in performing 6 cases of orthotopic heart transplantation during April 2006 to November 2008; (with record also showing his participation of performing extraction of hearts for 6 cases of orthotopic heart transplantation from brain-dead "donors" (male, age 27-35 yrs) during the same period.)

City of Shanghai (上海市)

As of 2014, WOIPFG has acquired general information regarding organ transplantation at 17 hospitals in City of Shanghai. According to incomplete statistics based on the released information, these hospitals have performed at least 7, 032 cases of kidney transplantation, 4, 296 cases of liver transplantation, 304 cases of heart transplantation, 110 cases of pulmonary transplantation, 10, 092 cases of corneal transplantation, at least 10 case of combined heart-lung transplantation, at least 7 cases of combined pancreas- kidney transplantation, at least 36 cases of combined liver- kidney transplantation, at least 2 case of transplantation of the entire set of (7) organs in the abdominal cavity, at least 1 case of combined liver-small intestine transplantation. WOIPFG hereby releases the list of 430 medical personnel of 20 hospitals in Shanghai subject to investigation.

44. Zhongshan Hospital, Fudan University (復旦大學附屬中山醫院)

Overview: This is one of the first set of “Class Three Grade A” hospitals approved in Shanghai starting from December 1991²⁴⁵. It was accredited to conduct liver, kidney, heart transplantation by the Ministry of Health of the PRC on May 23, 2007²⁴⁶, but it had established the Organ Transplantation Center on October 30, 2001²⁴⁷. The center conducted over 100 cases of organ transplant annually and the number of transplant was increasing by 50% every year. On December 8, 2003, the Organ Transplantation Center of this hospital joined with the largest organ transplant institute in the world to establish the “Cooperation Center for Zhongshan Hospital and Thomas E. Starzl Transplantation Institute (STI), University of Pittsburg”²⁴⁸. Professor John J. Fung, U.S. Director of this Sino-American Cooperation Center, even did a demonstrating operation in an operating room of Zhongshan Hospital for his colleagues in nationwide China²⁴⁹.

Kidney transplantation: In recent years, due to the shortage of “donors”, the number of organ transplants nationwide general decline; but this Hospital completed 60 cases of various types of kidney transplants in 2004, in 2005 reached to 153 cases; Nearly 1, 000 cases, performed up to present²⁵⁰;

Liver transplantation: FAN Jia, Associate Director Organ Transplantation Center; Professor, Chief Physician, vice president of the hospital²⁵¹, performed the first case doing as chief surgeon on April 16, 2001²⁵², making over 1, 100 cases conducted up to 2012²⁵³;

Heart transplantation: More than 45 cases, performed annually per the report²⁵⁴; 298 cases, conducted during May 2000 to April 2011²⁵⁵;

Lung transplantation: The Thoracic Surgery Department participated lung transplantation: Single lung and double lungs transplantation by various types of end-stage lung disease²⁵⁶. Lung transplantation team completed the first lung transplantation on September 2004²⁵⁷;

Combined transplantation: 6 cases of combined heart-lung transplantation, and 11 cases of combined liver-kidney transplantation altogether had been conducted in Zhongshan Hospital by 2004; the number of organ transplants grows rapidly every year²⁵⁸.

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
-------	------	----------------------------------	--------------------------------------------------------------------

Cases conducted/Department: The first case of liver transplantation was performed on April 16, 2001; with 1, 100 cases conducted at Department of Liver Cancer Surgery, up to 2012.

	FAN Jia (樊嘉)	Chief Physician, Professor, Associate Director, Organ Transplantation Center; Vice President, Zhongshan Hospital, Fudan University	Performed the first case of liver transplantation doing as chief surgeon on April 16, 2001, making over 1,100 cases conducted up to 2012; Participated in performing fast combined liver-kidney extractions from 117 fresh cadaveric "donors" (male 109, female 8; age range 18-47 yrs, average 28.6 yrs; due to sudden death) with parameter of warm ischemic time 1-5 min, during January 2004 to August 2006.

45. First People's Hospital (Shanghai Jiaotong University Affiliated First People's Hospital, now called Shanghai General Hospital) (上海市第一人民医院)

Overview: This is a “Class Three Grade A” general hospital, which was appoved by the Ministry of Health of the PRC in 1992²⁵⁹; and the one that was accredited to conduct liver transplantation, kidney transplantation on May 23, 2007²⁶⁰. “Shanghai Organ Transplantation Clinical Center” was established in August 2001, linked to the Hospital on the base of kidney transplantation projects with the “Shanghai Tissue Matching Center” joined as well. After the first case of kidney transplantation was performed in 1976, twelve types of transplant projects had been claimed including all kinds of kidney transplantation, heart transpantation, liver transplantation, combined liver-kidney transplantation, combined pancreas-kidney transplantation, combined kidney - islet cell transplantation, etc.²⁶¹, and the hospital was regarded as one of those providing the most types of related services in Shanghai.^{262,263,264,265}

Kidney transplantation: 767 cases performed, during 2001 to 2005, ranked first in Shanghai with the accumulated number of organ transplant as 1, 501 cases (also during other types like liver, bone marrow, heart, lung, combined liver-kidney, pancreas-kidney, corneal transplantation, etc.); Over 2,200 cases (150 cases per year), conducted up to present (including cadaveric kidney transplantation, related donor renal transplantation, combined liver-kidney transplantation, combined pancreas-kidney transplantation and kidney - islet cell transplantation.etc.);

Liver transplantation: 456 cases performed, during 2001 to 2005; 910 cases, conducted up to present, including 24 cases of combined liver-kidney transplantation (ranked first in China), and 26 cases of second time transplantation (ranked first in Shanghai);

Combined transplantation: The first case in Shanghai, or in China of combined pancreatic-kidney transplantation also with portal and intestinal drainage, conducted in 2002, 2003, respectively, with 7 cases performed up to present²⁶⁶; several dozens of cases of combined liver-kidney transplantation conducted up to 2006²⁶⁷; The staff in this hospital participated in performing the first case in Asia of all abdominal organs’ transplantation (7 organs at all) on December 14, 2004²⁶⁸;

Heart transplantation: One case performed, in April 2000, also another one in June 2004²⁶⁹;

Lung transplantation: One case of single (left) lung transplantation performed, on September 27, 2005²⁷⁰;

Corneal transplantation: 56 cases, conducted up to 2003²⁷¹; with 121 cases (122 eyes) conducted during January 2003 to

65. Chongqing Three Gorges Central Hospital (重庆三峡中心医院)

Overview: This is a “Class Three Grade A” hospital³⁴³, which was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health of the PRC in 2007. On Dec 18, 2000, the Hospital cooperated with the Xinqiao Hospital for performing three cases of kidney transplantation. On Sep 2, 2003, the first piggyback whole-liver transplantation of Wanzhou District was conducted³⁴⁴. The Associate Director Zhuhai Yu claimed that as early as in 2006 the Department of Urology had ever conducted kidney transplantation with mature technique. It discontinued due to the shortage of kidney grafts and the difficulty of matching. The Department has stated its development of a mature technology research team supported by China Tissue Typing and Matching Bank for Kidney Transplantation, re-performed kidney transplantation³⁴⁵. 97 cases of kidney transplantation had been conducted in cooperation with Chongqing Xinqiao Hospital, during January 2003 to May 2006.³⁴⁶

91. The Second People's Hospital of Laixi City (莱西市第二人民医院)

Overview: This is a “Class Two” general hospital⁴⁴⁸, which was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health in 2007. Kidney transplantation has been a key focus in it. In 2001, it co-invested 40 million Chinese yuan with a Canadian business (“Dongfang Trading Company” in Canada) to set up the Kidney Transplant Center⁴⁴⁹, and in every year there were domestic and overseas Chinese patients to receive hemodialysis and kidney transplantation within it. Recently over 100 cases of kidney transplantation had been performed. This hospital has close relationships with medical organizations nationwide and thus secures the resource of kidney graft supply⁴⁵⁰.

149. Weifang Rende Hospital (潍坊仁德医院)

Overview: This urological hospital specialized in blood purification and kidney transplantation, making itself the largest kidney disease treatment center in Weifang City. It technically collaborated with the hospital affiliated to Capital Medical University and took lead in developing HLA matching in Shandong province. Kidney Surgeons networked and set up an organ supply system to fully utilize "limited" organ resource as reported⁶⁴⁰. It was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health of the PRC in 2007. Kidney transplantations had been conducted in the hospital for almost 10 years and the hospital had finished preparatory work of combined pancreas-kidney transplantation and liver transplantation, and strived for horizontal expansion in blood purification and organ transplantation field, turning its "Kidney Transplantation Center" into "Organ Transplantation Center"⁶⁴¹. Over 1, 000 samples had been tested as of 2004 since examinations of HLA-A,B, DR matching and panel reactive antibody were conducted in 1998, and those samples could be exchanged with other standardized transplantaiton centers to meet clinical requirement⁶⁴².

**164. The Third Affiliated Hospital of Sun Yat-Sen University
(中山大学附属第三医院)**

Overview: This is a “Class Three Grade A” hospital formerly named “The Third Affiliated Hospital of Sun Yat-Sen University of Medical Science”⁶⁸¹. It was accredited to conduct liver transplantation by the Ministry of Health of the PRC on May 23, 2007⁶⁸², and has conducted ample cases, nearly 1, 000 cases of liver transplantation⁶⁸³.
 Liver transplantation: 16 cases of combined liver-kidney transplantation, conducted during October 2003 to December 2008⁶⁸⁴; 843 cases of liver transplantation, conducted during April 2001 to July 2006⁶⁸⁵; also 232 cases of combined liver-kidney extraction conducted, during January 2008 to June 2009⁶⁸⁶;
 Kidney transplantation: More than 100 cases performed annually; The case number and quality are increasing year by year, and the number will reach 200 cases annually within few years as predicted, making the hospital in the leading position in both Guangdong Province and China⁶⁸⁷;
 Corneal transplantation: Several types, performed by the Department of Ophthalmology⁶⁸⁸.

176. Guangdong Hospital of Traditional Chinese Medicine
(广东省中医院)

Overview: This hospital (including Second School of Clinic Medicine of Guangzhou University of Chinese Medicine and Academy of Traditional Chinese Medicine of Guangdong Province) has been expanded to a large traditional Chinese Medication general hospital network with five branch hospitals (General hospital of Dade Road, ErShaDao Branch, FangCun Branch, ZuHai Branch, and Guangzhou Higher Education Mega Center Branch), which are all of “Class Three Grade A” hospital⁷⁴⁸, and three branch clinics (XiaTang, TianHe, and LuoChongWei). It was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health of the PRC in 2007.

Kidney transplantation: Conducted by the Department of Second Surgery of ErShaDao Branch on August 6, 2003⁷⁴⁹; 89 cases (cadaveric), conducted in this hospital during May 2004 to December 2006⁷⁵⁰;

Liver transplantation: Transplant Center of South China was established on the 14th floor of the ward area (the Fourth Department of Surgery) on April 12, 2004;

Others: In addition to regular transplantation of liver, kidney, and pancreas, the Center also conducted Heart transplantation and living related kidney transplantation; Within less than two years, one case of combined liver-kidney transplantation, more than 20 cases of liver transplantation, more than 50 cases of kidney transplantation, and 5 cases of living related kidney transplantation had been conducted⁷⁵¹.

177. Guangzhou First People's Hospital (广州市第一人民医院)

Overview: This is a “Class Three Grade A” hospital that got this accreditation in the earliest stage from the Ministry of Health of the PRC in Guangdong Province in 1993⁷⁵². It was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health of the PRC in 2007. This hospital started conducting organ transplantation earlier than other city hospitals. The first kidney transplantation was conducted in 1992, the first heart transplantation was conducted in 1998, and the first liver transplantation was conducted in 2001. On that basis, all field of transplantation including liver, kidney, heart, pancreas, small intestine and abdominal organ cluster were conducted with the aggressive coordination of associated departments in the whole hospital. The hospital focuses on developing the Department of Organ Transplantation. The transplant experts in the First Affiliated Hospital of Sun Yat-Sen University including Professor Zheng Keli, Professor He Xiaoshun, and Professor Zhu Xiaofeng were invited as technical advisors⁷⁵³.

Kidney transplantation: 63 cases, conducted based on cooperating with the First Affiliated Hospital of Sun Yat-Sen University up to 2002⁷⁵⁴; 200 cases, conducted during December 2002 to December 2005⁷⁵⁵;

Liver transplantation: 10 cases, conducted during April 2004 to August 2005⁷⁵⁶.

**227. Xiaolan People’s Hospital of Zhongshan
(中山市小榄人民医院)**

Overview: This is a “Class Three Grade A” general hospital, facilitated with 13 operating cleanrooms and 2 of which are Class 100 laminar air flow cleanrooms, meeting the requirements for heart and liver transplantation. Professor Li Chaolong, former Director of Department of Hepatobiliary and Vascular Surgery and PhD supervisor of Nanfang Hospital affiliated to the First Military Medical University of People's Liberation Armed Forces (renamed as Nanfang Hospital of Southern Medical University), along with other 4 experts joined this hospital and conducted liver transplantation project. Department of Hepatobiliary Surgery was established under Li Chaolong’s leadership on January 6, 2003. In the same year, the hospital independently conducted its first case of liver transplantation on April 28 and is now capable of performing the entire treating procedures of liver transplantation. For further development of liver transplantation, the hospital signed an agreement with National Hepatobiliary and Enteric Surgery Research Center of Ministry of Health to establish Xiaolan Base of National Hepatobiliary and Enteric Surgery Research Center of Ministry of Health in July 2003.

Jiangsu Province (江苏省)

As of 2014, WOIPFG has acquired general information regarding organ transplantation conducted at 68 hospitals in 12 cities and regions of Jiangsu Province. According to incomplete statistics based on the released information, these hospitals have performed at least 6, 846 cases of kidney transplantation, 1, 109 cases of liver transplantation, 86 cases of heart transplantation, 229 cases of lung transplantation, 291 cases of corneal transplantation, one case of testis transplantation, 9 cases of combined liver-kidney transplantation, 5 cases of combined pancreas-kidney transplantation, and 6 cases of heart-lung transplantation. WOIPFG hereby releases the list of 671 medical personnel of 68 hospitals in Jiangsu Province subject to investigation.

Nanjing City (南京市)

235. Jiangsu Province People’s Hospital (江苏省人民医院)

Overview: This (also known as the First Affiliated Hospital of Nanjing Medical University, Clinical Medicine Research Institute of Jiangsu Province, Jiangsu Red Cross Hospital) is the largest “Class Three Grade A” general hospital in Jiangsu⁹²⁰. It was accredited to conduct liver transplantation, kidney transplantation, heart transplantation by the Ministry of Health of the PRC on May 23, 2007⁹²¹.

Kidney transplantation: The hospital has a kidney transplantation center and other associated units. The number of accumulated cases of kidney transplantation and multi-organ transplantation which had been conducted in the Department of Urology was over 1, 300⁹²²;

Liver Transplantation: 307 cases of cadaveric liver transplantation and 40 cases of living “donor” orthotopic liver transplantation, conducted during January 1995 to September 2005⁹²³; 125 cases of liver transplantation, conducted during March 2005 to November 2007⁹²⁴; 48 cases of modified piggyback liver transplantation, conducted during January 1, 2010 to December 31, 2010⁹²⁵; 52 cases of liver transplantation, conducted during September 2011 to December 2012⁹²⁶;

Lung transplantation: 5 cases of single lung transplantation, conducted for end-stage lung disease patients during June 2006 to November 2008⁹²⁷;

Heart transplantation: At least 2 cases of heart transplantations, conducted in March 2006 and October 2013 respectively⁹²⁸;

Corneal transplantation: The Department of Ophthalmology is the primary eye bank in Jiangsu province⁹²⁹.

236. Nanjing First Hospital (Nanjing No. 1 Hospital)
(南京市第一医院)

Overview: This, also known as The Affiliated Hospital of Nanjing Medical University, is a “Class Three Grade A” general hospital, which was among the first to receive accreditation from the Ministry of Public Health of the PRC⁹³². It was accredited to conduct heart transplantation by National Health and Family Planning Commission of the PRC on August 1, 2013⁹³³.

Kidney transplantation: 19 cases, conducted in the Department of Urology during September 2005 to 2008⁹³⁴;

Liver Transplantation: Conducted in the Department of General Surgery; this hospital regularly provided thymus transplantation, kidney transplantation and corneal transplantation, etc⁹³⁵;

Heart transplantation: 14 cases conducted, during August 2001⁹³⁶ to September 2005⁹³⁷; 18 cases, conducted since 2007⁹³⁸;

Corneal transplantation: The Primary eye bank of NanJing Red Cross was built in April 2001 by the hospital; Its main task is to collect, preserve, and study corneal materials so as to provide timely and reliable source for corneal transplantation⁹³⁹; 43 cases (43 eyes) of corneal transplantation had been conducted during January 2008 to April 2011⁹⁴⁰.

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Cases conducted/Department: 14 cases of heart transplantation had been conducted during August 2001 to September 2005, and 18 cases of heart transplantation had been performed since 2007.			
	CHEN Xin (陈鑫)	Chief Physician, Professor, Director, Department of Cardiothoracic Surgery, Nanjing First Hospital (Nanjing No. 1 Hospital)	Participated in performing 16 cases of various types of heart transplantation (including bicaval technique for orthotopic heart transplantation) by 2008; Participated in performing extraction of hearts for transplantation from 6 brain-dead “donors” (age range, 27-39 yrs) during August 2001 to April 2003.
	QIU Zhibing (邱志兵)	Deputy Chief Physician, Department of Cardiothoracic Surgery, Nanjing First Hospital (Nanjing No. 1 Hospital)	Participated in performing 7 cases of heart transplantation up to September 2005; Participated in performing extraction of hearts for transplantation from 6 brain-dead “donors” (age range, 27-39 yrs) during August 2001 to April 2003.
	XU Ming (徐明)	Deputy Chief Physician, Associate Professor, Associate Director, Department of Cardiothoracic Surgery, Nanjing First Hospital (Nanjing No. 1 Hospital)	Participated in performing 6 cases of heart transplantation during August 2001 to April 2003; (with record also showing his participation of performing extraction of hearts for transplantation from 6 brain-dead “donors” (age range, 27-39 yrs) during the same period.)
	JIANG Yingshuo	Department of Cardiothoracic Surgery,	Participated in performing 6 cases of heart transplantation during August 2001 to

237. Nanjing Drum Tower Hospital (南京鼓楼医院)

Overview: This, also called The Affiliated Hospital of Nanjing University Medical School, is a “Class Three Grade A” general hospital⁹⁴¹. It was accredited to conduct liver transplantation by the Ministry of Health of the PRC on May 23, 2007⁹⁴².

Kidney transplantation: Over 50 cases, conducted annually; Kidney transplantation and combined kidney-liver transplantation, conducted in the Department of Urology⁹⁴³;

Liver transplantation: 314 cases, conducted during January 1996 to March 2008⁹⁴⁴;

Combined transplantation: 4 cases of combined liver-kidney, conducted during October 2000 to December 2002⁹⁴⁵;

Corneal transplantation: 12 cases (13 eyes) penetrating keratoplasty, conducted during January 2001 to December 2005 (“donors” aged around 20)⁹⁴⁶.

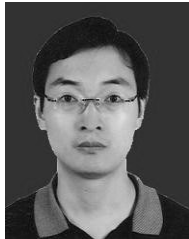

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Cases conducted/Department: 314 cases of the liver transplantation had been conducted January 1996 to March 2008; and 4 cases of liver-kidney transplantation conducted during October 2000 to December 2002.			
	DING Yitao (丁义涛)	Chief Physician, Professor, Department of General Surgery, President, Nanjing Drum Tower Hospital	Participated in performing 166 cases of liver transplantation during 1996 to 2004; Participated in performing combined liver-kidney extractions from 42 cadaveric “donors” (male 40, female 2, age range 19-38 yrs; no history of transmissible, infectious diseases, or liver or kidney diseases), 42 livers and 84 kidneys extracted, during June 2004 to June 2005; Participated in performing 314 cases of liver transplantation from “donors” with parameter of warm ischemic time 0- 2 min, during January 1996 to March 2008.
	WU Yafu (吴亚夫)	Chief Physician, Professor, Director, Department of General Surgery, Liver Transplant Ward, Nanjing Drum Tower Hospital	Participated in performing 166 cases of liver transplantation during 1996 to 2004; Participated in performing combined liver-kidney extractions from 42 cadaveric “donors” (male 40, female 2, age range 19-38 yrs; no history of transmissible, infectious diseases, or liver or kidney diseases), having 42 livers and 84 kidneys extracted, during June 2004 to June 2005; Participated in performing 314 cases of liver transplantation from “donors” with parameter of warm ischemic time 0- 2 min, during January 1996 to March 2008.

**Zhejiang Province
(浙江省)**

As of 2014, WOIPFG has acquired general information regarding organ transplantation at 46 hospitals in 11 cities and regions of Zhejiang Province. According to incomplete statistics based on the released information, these hospitals have performed transplantation including at least 8,061 cases of kidney transplantation, 1993 cases of liver transplantation, 30 cases of heart transplantation, 8 cases of lung transplantation, 4,025 cases of cornea transplantation, one case of testis transplantation, one case of small intestine transplantation, 2 cases of heart-lung transplantation, 3 cases of combined heart-kidney transplantation, 38 cases of combined liver-kidney transplantation, 13 cases of combined pancreas-kidney transplantation. WOIPFG hereby releases the list of 493 medical personnel of 46 hospitals in Zhejiang Province subject to investigation.

Hangzhou City (杭州市)

303. The First Affiliated Hospital, Zhejiang University (浙江大学附属第一医院)

Overview: This is a “Class Three Grade A” general hospital¹¹⁶¹, which was accredited to conduct liver and kidney transplantation by the Ministry of Health of the PRC on May 23, 2007¹¹⁶². Key Laboratory of Combined Multi-Organ Transplantation was established by the Ministry of Health in March 2001, and it included both clinical and basic aspects. Clinical aspects have been established in liver transplantation, kidney transplantation, bone marrow transplantation, heart and lung transplants, and other special clinical base. Its multi-organ transplantation institute has become one of the largest organ transplant centers, and the largest organ transplant center in Eastern China. Multi-organ transplantation has been listed as the project promoted by the Ministry of Health, which was to distribute and support technology to more than 20 provincial and municipal hospitals. The main research field is for those of basic and clinical studies of multi-organ transplantation , including liver -kidney, pancreas - kidney, liver- intestine, liver - pancreas, liver-heart and liver-bone marrow transplantation, combined heart and multi-abdominal organs, living “donor” liver transplantation research, and HLA loci matching technology¹¹⁶³.

Liver transplantation: 2 cases had been conducted during 1993 to 1997 since the first case was performed in 1993¹¹⁶⁴; 15 cases, conducted in 1999; 103 cases, conducted during January 2000 to September 2002¹¹⁶⁵; 1, 521 cases, conducted up to July 8, 2014¹¹⁶⁶;

Kidney transplantation: More than 3, 300 cases conducted; 280 cases conducted annually¹¹⁶⁷;

Heart transplantation: The first case was performed in 1999; The first case and second case of combined heart-lung transplantation in the province were conducted in 2000 and 2002¹¹⁶⁸; The first case (in the province) of combined heart-kidney transplantation, conducted by a single unit in 2011; The first DCD (“donor” after cardiac death) case in the province, conducted in 2012¹¹⁶⁹;

Lung transplantation: 3 cases conducted (one single lung, and two sequential double lung transplantation), during August 2011 to June 2012¹¹⁷⁰; 4 cases of complex lung transplantation had been sequentially conducted in the short term, and one of them was complex lung re-transplantation¹¹⁷¹;

Combined transplantation: 25 cases of combined liver-kidney transplantation, conducted up to June 2012¹¹⁷²; 6 cases of combined pancreas-kidney transplantation conducted since April 1994, for the treatment of type 1 diabetes complicated with uremia¹¹⁷³;

Corneal transplantation: Performed, with long history in the Department of Ophthalmology¹¹⁷⁴.

304. Zhejiang Provincial People's Hospital (浙江省人民医院)

Overview: It was evaluated as a “Class Three Grade A” hospital in 1993¹¹⁷⁶, which was accredited to conduct heart transplantation by the Ministry of Health of the PRC on May 23, 2007¹¹⁷⁷. It has conducted kidney transplantation, umbilical cord blood transplantation, bone marrow transplantation and corneal transplantation surgery. Bone marrow transplantation and corneal transplantation are currently ranked with a leading position in the province¹¹⁷⁸.

Kidney transplantation: 11 cases of laparoscopic, and 15 cases of living “dornor” kidney transplantation, conducted during April 2004 to October 2009¹¹⁷⁹;

Liver transplantation: Conducted recently¹¹⁸⁰;

Heart transplantation: The first case in the province, performed in the Department of Cardiothoracic Surgery; 19 cases conducted up to present, including 2 cases of combined heart-kidney transplantation¹¹⁸¹;

Corneal transplantation: 41 cases (41 eyes) of penetrating keratoplasty, conducted during June 2006 to June 2009¹¹⁸².

435. The Third Xiangya Hospital of Central South University (中南大学湘雅三医院)

Overview: This is a “Class Three Grade A” hospital¹⁶⁴⁶, which was accredited to conduct liver transplantation and kidney transplantation by the Ministry of Health of the PRC on May 23, 2007¹⁶⁴⁷. The Engineering and Technology Research Center for Transplantation Medicine of the Ministry of Health of the PRC was formally established at the hospital after discussions by relevant domestic specialists organized by the Ministry of Health and upon its approval in 2005. The Center has conducted several hundred cases of piggyback liver transplantation and more than 1, 000 cases of kidney transplantation over the course of 3 years since its establishment. Other transplantation conducted by the Center included combined liver-kidney transplantation, combined liver-pancreas transplantation, combined liver-intestinal transplantation, combined pancreas-kidney transplantation, combined transplantation of multiple organs, spleen transplantation, pancreas transplantation, heart transplantation, split liver transplantation and living-related liver

**443. Changde No. 3 People’s Hospital
(常德市第三人民医院)**

Overview: This is a “Grade B” hospital. The hospital’s featuring division, the Organ Transplant Center, took the lead in conducting kidney transplantation in the northwestern region of Hunan and is ranked the highest in Hunan province for the number of organ transplant conducted¹⁶⁷⁶. The hospital was not accredited to conduct organ transplantation due to it not passing the qualification review by the Ministry of Health of the PRC in 2007. In 1998, the hospital took the lead in conducting the first case of kidney transplantation in Changde city and has since performed anywhere from 50 to 100 cases of kidney transplantation annually. The hospital has a steady, reliable supply of kidneys¹⁶⁷⁷. By 2006, the hospital had not only found matching organs for over 600 of its own patients, but had collaborated with over 10 partnering hospitals in finding more than 130 cases of matching organs for their patients¹⁶⁷⁸. At the same time, the hospital conducted more than 10 cases of penetrating keratoplasty and lamellar keratoplasty¹⁶⁷⁹.

Yongzhou City (永州市)

460. Yongzhou People's Hospital (Yongzhou Central Hospital) 永州市人民医院(永州市中心医院)

Overview: This hospital had its name officially changed to Yongzhou Central Hospital in May, 2011¹⁷³⁸. It is a “Class Three Grade A” general hospital¹⁷³⁹, which was not accredited to conduct organ transplantation due to it not passing the qualification review by the Ministry of Health of the PRC in 2007. In 1999, the hospital established the Yongzhou Kidney Transplant Center¹⁷⁴⁰. Currently, the hospital is able to conduct kidney and corneal transplantation on a regular basis¹⁷⁴¹. Since October, 1998, less than one month after complementary training courses had been offered to nurses, and with exceedingly poorly equipped sickrooms, the hospital began conducting kidney transplant surgeries and had since conducted more than 20 cases of kidney transplantation¹⁷⁴².

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Case conducted/Department: Over 20 cases of kidney transplantation, conducted at the Department of Urology starting from October 1998.			
	LI Yujia (李羽佳)	Chief Physician, Department of Urology, Yongzhou Central Hospital (South Yard)	Participated in performing kidney transplantation (number of cases, to be investigated).
	ZHANG Jun (张军)	Department of Urology, Yongzhou Central Hospital (South Yard)	Participated in performing kidney transplantation (number of cases, to be investigated).
	HE Yumei (何玉梅)	Department of Urology, Yongzhou Central Hospital (South Yard)	Participated in performing kidney transplantation (number of cases, to be investigated).
	CHEN Zheng (陈正)	Department of Urology, Yongzhou Central Hospital (South Yard)	Participated in performing kidney transplantation (number of cases, to be investigated).
	ZHONG Hai (钟海)	Department of Urology, Yongzhou Central Hospital (South Yard)	Participated in performing kidney transplantation (number of cases, to be investigated).
Case conducted/Department: Corneal transplantation can be performed at Department of Ophthalmology.

Hebei Province (河北省)

As of 2014, WOIPFG has acquired general information regarding organ transplantation at 30 hospitals in 10 cities and regions of Hebei Province. According to incomplete statistics based on the released information, these hospitals have performed transplantation including at least 1523 cases of kidney transplantation, 404 cases of liver transplantation, 5 cases of heart transplantation, 6126 cases of corneal transplantation. WOIPFG hereby releases the list of 176 medical personnel of 34 hospitals in Hebei Province subject to investigation.

Shijiazhuang City
(石家庄市)

464. The Second Hospital of Hebei Medical University
(河北医科大学第二医院)

Overview: This is a “Class Three Grade A” hospital¹⁷⁵¹, which was accredited to conduct the kidney and heart transplantation by National Health and Family Planning Commission of the PRC on August 1, 2013¹⁷⁵².
 Kidney transplantation: The first case was conducted in Hebei in 1976. Doctor CAI Wenqing and LI Wei conducted the first living-related donor kidney transplantation in Hebei Province in 2002. More than 100 cases of kidney transplantation have been conducted by now ; the average number has reached 20 cases per year¹⁷⁵³;
 Liver transplantation: 20 cases conducted¹⁷⁵⁴;
 Heart transplantation: One case conducted on April 28, 2003¹⁷⁵⁵.

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Cases conducted/Department: More than 100 cases of kidney transplantation have been conducted up to now; the average number has reached 20 cases per year.			
	CAI Wenqing (蔡文清)	Chief Physician, Professor, Department of Urology, The Second Hospital of Hebei Medical University	Participated in performing the first living related kidney transplantation in Hebei as leader of the Department of Urology.
	LI Wei (黎玮)	Chief Physician, Professor, Postgraduate Supervisor, Associate Director, Department of Urology, The Second Hospital of Hebei Medical University	Participated in performing the first living related kidney transplantation in Hebei in 2001; Participated in performing 6 cases of kidney transplantation during 2002 to 2008.
	LU Baosai (路保赛)	Resident, Department of Urology, The Second Hospital of Hebei Medical University	Participated in performing kidney transplantation (number of cases, to be investigated).

468. Shijiazhuang Kidney Disease Hospital (石家庄肾病医院)

Overview: This is a “Class Three, Grade A” modernized kidney healthcare center embracing clinical treatment, education and research. Being as one of the country’s largest hospitals, it has the most advanced medical facilities and strong medical resources for kidney treatment like introduced¹⁷⁶⁴. It was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health of the PRC in 2007. Since its first kidney transplantation conducted in 2003 in the Department of Urology, hundreds of kidney transplantation had been performed up to now. The Department of Urology claimed that early 300 recipients became convalescent after kidney transplantation. Part of the recipients came from Indonesia and Malaysia other than China¹⁷⁶⁵.

499. Fujian Medical University Union Hospital (福建医科大学附属协和医院)

Overview: This is a “Class Three Grade A” general hospital ¹⁸⁴¹, which was accredited to conduct heart and lung transplantation by the Ministry of Health of the PRC on May 23, 2007¹⁸⁴².

Liver transplantation: A liver transplant program, including employing piggyback technique for treating end-stage and congenital liver disease and liver cancer, has been launched since 2000 and a series of complex transplantation, including first case of pediatric piggyback liver transplantation in the province was conducted¹⁸⁴³; First case of liver transplantation for a patient previously undergoing heart transplantation in Asia, conducted in 2005¹⁸⁴⁴;

Kidney transplantation: 23 cases, conducted to date ¹⁸⁴⁵;

Heart transplantation: 111 cases, conducted during August 1995 to October 2007¹⁸⁴⁶; The hospital has become a base of heart transplantation in China, assisting 40 plus major hospitals, including Beijing, Shanghai, Tianjin, Guangzhou, Nanjing, Chongqing, Wuhan, etc. to conduct heart transplantation¹⁸⁴⁷;

Heart-lung transplantation: 4 cases, conducted during December 2004 to 2008¹⁸⁴⁸;

Lung transplantation: 2 cases of single-lung transplantation and 1 case of double-lung transplantation, conducted during June 2005 to 2007¹⁸⁴⁹.

Liaoning Province (辽宁省)

Thus far, WOIPFG has acquired organ harvesting information from 34 hospitals in 11 cities of Liaoning Province. Based on incomplete statistics from publicly available information, these hospitals have, in total, performed at least 2, 535 cases of kidney transplantation, at least 749 cases of liver transplantation, at least 9 cases of heart transplantation, at least 12 cases of lung transplantation, at least 3, 844 cases of corneal transplantation, at least 3 cases of combined heart-lung transplantation, at least 8 cases of combined liver-kidney transplantation, at least 46 cases of combined pancreas-kidney transplantation, and at least 4 cases of combined islet-kidney transplantation. WOIPFG shall hereby release the list of 191 medical personnel from 34 hospitals in Liaoning Province.

Shenyang City (沈阳市)

518. The First Hospital of China Medical University (中国医科大学附属第一医院)

Overview: This is a “Class Three Grade A” hospital¹⁹¹³, which is accredited to conduct liver, kidney transplantation on May 23, 2007 by the Ministry of Health of the PRC¹⁹¹⁴. Led by Yongfeng Liu, the hospital conducted many kinds of organ transplantation, including kidney transplantation, liver transplantation, combined liver-kidney transplantation, combined pancreas-kidney transplantation, and combined pancreatic islet-kidney transplantation¹⁹¹⁵. Organ Transplantation Institute was established in 2002, with a new organ transplant ICU ward founded¹⁹¹⁶. This hospital had performed more than 800 cases of kidney transplantation, more than 200 cases of liver transplantation, 6 cases of combined liver-kidney transplantation, 26 cases combined pancreas-kidney transplantation, 3 cases of combined

529. Dalian (Municipal) Friendship Hospital (大连市友谊医院)

Overview: This is a “Class Three Grade A” hospital, which was approved by Ministry of Health of the PRC in 1994 and 2007, respectively. It was accredited to conduct kidney transplantation by the National Health and Family Planning Commission of the PRC on August 1, 2013¹⁹⁴⁶. This hospital is one of the first to have performed kidney transplantation, liver transplantation, and combined liver-kidney transplantation since 1997¹⁹⁴⁷. The hospital conducted 1 case of liver transplantation and 4 cases of kidney transplantation in 14 hours on February 1, 2002¹⁹⁴⁸.

Kidney transplantation: The Kidney Transplantation Department was established in 2001; more than 350 cases had been performed up to present¹⁹⁴⁹. Zhilin Hu, Director and Chief Physician of Dalian Kidney Transplant Center¹⁹⁵⁰, had conducted more than 500 cases up till December 2006¹⁹⁵¹;

Liver transplantation: The hospital is one of the first to conduct liver transplantation in the Dalian area, and had conducted 50 cases of liver transplantation up to present. The hospital is capable of handling liver transplantation postoperation follow up in Dalian, and about 120 patients visit the hospital annually for postoperation follow up¹⁹⁵²;

Corneal transplantation : Performed in the Department of Ophthalmology¹⁹⁵³;

Combined transplantation: The first case of liver-kidney transplantation was conducted in north-east area of China on November 10, 2003¹⁹⁵⁴.

530. Xinhua Hospital of Dalian University (大连大学附属新华医院)

Overview: This is a “Class Three Grade A” general hospital¹⁹⁵⁵, which was not accredited to conduct organ transplantation due to not passing the qualification review by the Ministry of Health of the PRC in 2007. The hospital had conducted 5 cases of orthotopic heart transplantation during January to May 2005¹⁹⁵⁶. It conducted 3 cases of kidney transplantation on a single day on December 30, 2006, and had performed about 30 cases of major organ transplantation and multiple-organ transplantation¹⁹⁵⁷. It performed one case of kidney transplantation as well as one case of lung transplantation on March 13, 2005¹⁹⁵⁸. After the first case of lung allotransplantation was performed in January 2005, it had ever performed the first case and the second case in Northeast China of bilateral sequential lung transplantation without cardiopulmonary bypass in March and April of that year. Later it performed the first case of single lung transplantation and repair of interventricular septal defect for an Eisenmenger Syndrome patient with pulmonary hypertension, as well as the first case of combined cardiac-lung transplantation in northeast China¹⁹⁵⁹. On March 14, 2006, the hospital performed a case of combined heart-kidney transplantation and a case of double-lung transplantation on the same day¹⁹⁶⁰. Since Jiangning Wang was appointed President of the hospital on December 2002, its revenue increased threefold within five years, with heart transplantation, lung transplantation, liver transplantation and kidney transplantation conducted in this hospital, therefore becoming the only institute in Northeast China that had transplantation service of all the four major organs.

564. The 2nd Affiliated Hospital of Harbin Medical University (哈尔滨医科大学附属第二医院)

Overview: This is a “Class Three Grade A” hospital²⁰⁵⁹, which was accredited to conduct kidney, heart, and lung transplantations by National Health and Family Planning Commission of the PRC on August 1, 2013²⁰⁶⁰. The hospital professed that it could conduct heart transplantation, lung transplantation, liver transplantation, spleen transplantation, kidney transplantation, testis transplantation, heart-lung transplantation, combined pancreas-kidney transplantation, combined thyroid-parathyroid-thymus transplantation, corneal transplantation, bone marrow transplantation, etc.²⁰⁶¹

Kidney transplantation: Over 400 cases, conducted in the Department of Urology; Testis transplantation, adrenal transplantation, living “donor” kidney transplantation, and combined pancreas-kidney transplantation, conducted in succession²⁰⁶²;

Testis transplantation: 11 cases, conducted during January 1989 to January 1995²⁰⁶³;

Spleen transplantation: Cadaveric-unrelated donor spleen transplantation, conducted on January 15, 2000²⁰⁶⁴;

Combined transplantations: 1 case of heart-lung transplantation, conducted on April 9, 2000²⁰⁶⁵; 1 case of combined pancreas-duodenal-kidney transplantation, on June 18, 2000²⁰⁶⁶;

Liver transplantation: 28 cases, conducted as of 2010²⁰⁶⁷;

Heart transplantation: 15 cases, conducted during April 1992 to December 2005²⁰⁶⁸;

Lung transplantation: 1 case, conducted on May 23, 2004²⁰⁶⁹;

Corneal transplantation: Xuefei Zhang, Deputy Chief Physician, Associate Professor, specialized in corneal transplantation and ocular surface transplantation²⁰⁷⁰.

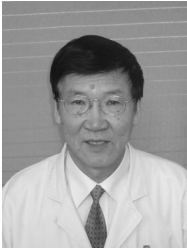

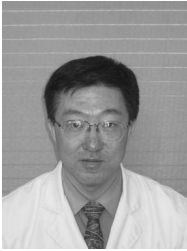

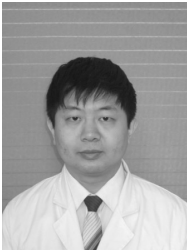

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Cases conducted/Department: Over 400 cases of kidney transplantation were conducted in the Department of Urology, which successively conducted testis transplantation, adrenal transplantation, living “donor” kidney transplantation, and combined pancreas-kidney transplantation.			
	ZHU Qingguo (祝青国)	Chief Physician, Professor, Director, Department of Urology, The 2nd Affiliated Hospital of Harbin Medical University	Participated in performing over 100 cases of kidney transplantation, taking charge in kidney transplantation program in the hospital now.

588. Hefei Bright Eye Hospital (合肥普瑞眼科医院)

Overview: This hospital is the combination of clinical practice, preventive healthcare and therapeutic procedures. This is a large professional hospital network with large institutions such as a province level, professional myopia-preventing center and province Red Cross Corneal Bank. Cornea transplantation had been conducted extensively²¹⁴⁷. It claimed that grafts from “donors” were abundant. Anhui Red Cross Corneal Bank was also established. The abundant “donor” resources had shortened greatly the waiting time for patients, making it become a professional cornea transplantation center in Eastern China Region²¹⁴⁸.

(江西省)

To date, World Organization to Investigate the Persecution of Falun Gong has already obtained the general information on organ transplantation at 22 hospitals in 8 cities of Jiangxi Province. According to the incomplete statistics based on the published materials, these hospital have totally conducted at least 1, 176 cases of kidney transplantation, at least 320 cases of liver transplantation, at least 4 cases of heart transplantation, at least 11, 537 cases of corneal transplantation, at least 2 cases of combined liver-kidney transplantation, at least 2 cases of combined pancreas-kidney transplantation. WOIPFG hereby releases the list of 144 medical personnel at the 22 hospitals under investigation in Jiangxi Province.

Nanchang City (南昌市)

615. The First Affiliated Hospital of Nanchang University (南昌大学第一附属医院)

Overview: This is a “Class Three Grade A” provincial general hospital²²¹², which was accredited to conduct liver transplantation, kidney transplantation, pancreas transplantation and intestinal transplantation by the National Health and Family Planning Commission of the PRC on August 1, 2013²²¹³. This hospital started to conduct kidney transplantation in 1999, and it later conducted heart transplantation, liver transplantation, combined liver-kidney transplantation, combined pancreas-kidney transplantation, bone marrow transplantation, and corneal transplantation. The Transplantation Center of the Hospital has comprehensive equipment and facilities, including typing and matching equipment. The Transplantation Center had conducted 9 cases of liver transplantation and 18 cases of kidney transplantation within the first four months since its establishment, and completed 6 cases of major organ transplantation within one day²²¹⁴.
Kidney transplantation: 204 cases, conducted during January 2000 to December 2005²²¹⁵; 88 cases of living “donor” kidney extraction, conducted during December 2005 to July 2009²²¹⁶; 84 cases of cadaveric kidney transplantation, conducted during October 2004 to January 2007²²¹⁷; 165 cases, conducted during 2007 to 2012²²¹⁸;
Liver transplantation: 87 cases, conducted during April 2002 to July 2006²²¹⁹;
Heart transplantation: 3 cases of orthotopic heart transplantation, conducted during August 2001 to December 2003²²²⁰;
Corneal transplantation: Over 1, 000 cases, conducted²²²¹; The Department of Ophthalmology is one of those departments and divisions that started conducting corneal transplantation earlier in Jiangxi province.

Guangxi Zhuang Autonomous Region (广西壮族自治区)

As of 2014, WOIPFG has acquired general information regarding organ transplantation at 18 hospitals in 7 cities and regions of Guangxi Zhuang Autonomous Region. According to incomplete statistics based on the released information, these hospitals have performed transplantation including at least 481 cases of kidney transplantation, 169 cases of liver transplantation, 35 cases of heart transplantation, 338 cases of corneal transplantation, 2 cases of combined liver-kidney transplantation, one case of combined pancreas-kidney transplantation, one case of pancreas transplantation, one case of adrenal gland transplantation. WOIPFG hereby releases the list of 209 medical personnel of 18 hospitals in Guangxi Zhuang Autonomous Region subject to investigation.

Nanning City (南宁市)

637. The First Affiliated Hospital of Guangxi Medical University (广西医科大学第一附属医院)

Overview: This is the first “Class Three Grade A” general hospital in Guangxi region²²⁸¹. It was accredited to conduct liver transplantation by the Ministry of Health of the PRC on May 23, 2007²²⁸². The Department of Urology is composed of 2 units, Urological Surgery and Kidney Transplantation. The Kidney Transplantation unit mainly conducts kidney transplantation, including cadaveric kidney transplantation and living-related kidney transplantation²²⁸³.

Kidney transplantation: 30 cases, conducted as of 2005²²⁸⁴;

Liver and combined transplantations: The first case of liver transplantation in Guangxi Region was performed; Over 100 cases of piggy-back orthotopic liver transplantation and 2 cases of combined liver-kidney transplantation, conducted to date; with the first case in Asia of second time liver transplantation with combined kidney transplantation conducted at the Department of Hepatobiliary Surgery²²⁸⁵; consecutive 100 cases of liver transplantation, conducted during April 2001 to February 2010²²⁸⁶; 105 cases conducted during 1999 to 2009²²⁸⁷;

Corneal transplantation: Various corneal transplantations, also amnion and stem cell transplantations, conducted in the Department of Ophthalmology with the former one belonged to the most earliest and most conducted project in Guangxi Region²²⁸⁸; 216 cases of corneal transplantation conducted during May 1995 to May 2005, in which corneas had been extracted from young and middle-aged “donors” dying from sudden-death²²⁸⁹.

Photo	Name	Title and Affiliated Institution	Organ Harvesting Cases Involved and/or Organ Procurement Situation
Cases conducted/Department: 30 cases of kidney transplantation had been conducted as of 2005.

hospital²⁴⁶³, which was accredited to conduct liver and kidney transplantation by the Ministry of Health of the PRC on May 23, 2007²⁴⁶⁴. The Institute of Organ Transplantation of Xi'an Jiaotong University was officially established in 2001²⁴⁶⁵.

Kidney transplantation: 3, 596 cases, conducted as of December 2012; and the hospital has instructed over 10, 000 cases of kidney transplantation to 23 other hospitals in 13 provinces nationwide, initiating and helping liver, heart, lung, and small intestine transplantations in midwest China and serving as a demonstration effect of organ transplantation projects²⁴⁶⁶; 3, 764 cases, conducted up to December 2013²⁴⁶⁷;

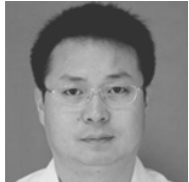

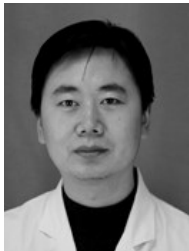

Liver transplantation: The first case of cadaveric liver transplantation in northwest China, conducted in 2000; Over 200 cases, conducted as of April 2010²⁴⁶⁸;

Heart transplantation: 1 case of orthotopic heart transplantation, conducted in June 2005²⁴⁶⁹;

Other transplantation: 1 case of small intestine transplantation, performed in May 2004²⁴⁷⁰;

Lung transplantation: Performed at the Department of Thoracic Surgery on November 23, 2006²⁴⁷¹.

Corneal transplantation: Conducted in the Department of Ophthalmology²⁴⁷².

Yunnan Province

(云南省)

Thus far, WOIPFG had obtained the general information regarding organ transplantation at 26 hospitals in 8 cities and regions of Yunnan Province. According to incomplete statistics based on the released information, these hospitals performed at least 2448 cases of kidney transplantation, 399 cases of liver transplantation, 20 cases of heart transplantation, 3 cases of lung transplantation, 1, 328 cases of corneal transplantation, 3 case of heart-lung transplantation, one case of simultaneous liver-kidney transplantation. WOIPFG hereby releases the list of 238 medical personnel of 27 hospitals in Yunnan Province subject to investigation.

Kunming City
(昆明市)

712. First People’s Hospital of Yunnan Province
(云南省第一人民医院)

Overview: This is a “Class Three Grade A” hospital²⁵¹⁸, which was accredited to conduct liver and kidney transplantations by National Health and Family Planning Commission of the PRC on August 1st, 2013²⁵¹⁹.
 Liver transplantation: 23 cases (“piggyback orthotopic liver transplantation in adults”) as the first cluster in Yunnan Province, performed by Department of Hepatobiliary Surgery during August 2000 to present; The first case in the world of “heterotopic auxiliary liver transplantation in spleen fossa with splenectomy” had been conducted independently²⁵²⁰;
 Heart transplantation: 1 case (orthotopic heart transplantation), conducted in 2005²⁵²¹;
 Lung transplantation: 1 case (single lung transplantation), conducted on November 30, 2005²⁵²²;
 Corneal transplantation: Keratoplasty combined glaucoma treatment, cataract extraction combined intralocular lens implantation, and vitrectomy had been developed in 2000 with several patients having keratopathy and complicated ocular trauma treated up to present²⁵²³.

713. First Affiliated Hospital of Kunming Medical University (昆明医学院第一附属医院)

Overview: This, nowadays known as Affiliated Hospital of Yunnan University College of Medicine, is a “Class Three Grade A” hospital approved by the Ministry of Health of the PRC in January 1993²⁵²⁴. It was accredited to conduct liver, kidney, pancreas, and intestine transplantations by National Health and Family Planning Commission of the PRC on August 1, 2013²⁵²⁵.

Kidney transplantation: 19 cases (living “donor” kidney transplantation), conducted during February 2002 to May 2006²⁵²⁶; 84 cases, conducted during February 2006 to February 2008²⁵²⁷;

Liver transplantation: 55 cases, conducted during April 2005 to May 2007²⁵²⁸; 12 cases, conducted during 2007 to 2009²⁵²⁹; 3 patients, concurrently underwent liver transplantation on June 24, 2005²⁵³⁰;

Heart transplantation: Starting from 2005, the hospital took only 2 years to hold 3 national records, including the oldest age of heart transplantation nationwide, and the oldest age of combined heart and lung transplantation, the shortest length of hospitalization, and the lowest medical expense of heart transplantation, under the leadership of the president of the hospital, Chen Mingqing²⁵³¹;

Lung transplantation: 1 case (single (right) lung), conducted in January 2006²⁵³²;

Corneal transplantation: 300 cases (300 eyes), conducted during November 2001 to October 2004, and 215 out of 300 eyes were used for penetrating lamellar keratoplasty and the rest were used for lamellar keratoplasty²⁵³³; Another 230 cases (230 eyes; penetrating lamellar keratoplasty, 190; lamellar keratoplasty, 40), conducted during November 2004 to December 2007²⁵³⁴.

Xinjiang Uygur Autonomous Region
(新疆维吾尔自治区)

Up to now, WOIPFG has acquired general information regarding organ transplantation from 4 hospitals in 2 cities in Xinjiang Uygur Autonomous Region. Based on the incomplete statistics from the publicly available information, at least 780 cases of kidney transplantation, at least 35 cases of liver transplantation, at least 1 case of heart transplantation, at least 3 cases of lung transplantation, and at least 104 cases of corneal transplantation were conducted at these hospitals. WOIPFG hereby releases the list of 101 medical personnel of the 5 hospitals in Xinjiang Uygur Autonomous Region under investigation.

Urumqi City
(乌鲁木齐市)

762. The First Hospital of Xinjiang Medical University
(新疆医科大学第一附属医院)

Overview: This is a “Class Three Grade A” hospital²⁶⁷⁴, which was accredited to conduct liver transplantation, kidney transplantation, lung transplantation, pancreas transplantation and small intestine transplantation by the National Health and Family Planning Commission of the PRC on August 1, 2013²⁶⁷⁵. Its Institute of Organ Transplantation was established in July 2002; Hao Wen, Director of the Institute, led the subordinate divisions/laboratories of liver transplantation, bone marrow transplantation, kidney transplantation, and corneal transplantation to set up the working focuses in these areas²⁶⁷⁶.

Kidney transplantation: 779 cases, performed during August 1999 to September 2008²⁶⁷⁷;
