Doctor: Hello?

Investigator: It's the First Affiliated Hospital, right? Urology Department? This is my situation: our family member has uremia. The doctor suggests a kidney transplant. I've come to the hospital for this surgery. Could you tell me how to make an appointment and which doctor to see? Would you give me some information on it?

Doctor: When?

Investigator: Um...

Doctor: Do you want to come tonight or tomorrow?

Investigator: Um... I'll come tomorrow.

Doctor: Tomorrow is fine. Our director is on duty tomorrow. Just come to the ward after making an appointment.

Investigator: Okay.

Doctor: And it's on the 11th floor of the inpatient building.

Investigator: So it's on the 11th floor, right? Is that correct?

Doctor: Yes, that's correct.

Investigator: Um, what's the director's name?

Doctor: Wang Sen, Director Wang. Wang Sen, Sen as in forest, three woods.

Investigator: Oh, Sen as in forest. He's the director, right?

Doctor: Yes.

Investigator: This director is quite good at it, isn't he?

Doctor: Right, right.

Investigator: Oh, may I ask you something...that is, currently you...

Doctor: He's a deputy director at a higher level.

Investigator: Oh.

Doctor: So what?

Investigator: Now, isn't this pandemic a constraint?

Doctor: Eh, yes, you need to have covid test.

Investigator: Oh, I see.

Doctor: You need the covid test result to schedule an appointment.

Investigator: Got it. Oh, and another thing is, how many surgeries can he perform in a month? This director?

Doctor: What do you mean?

Investigator: I mean, so that we wouldn't be worried about his skills; if he performs many surgeries, there won't be any concern about his skills.

Doctor: Kidney transplants alone, many are performed, each day...each month, many are performed.

Investigator: Oh.

Doctor: Don't worry about it, you can be rest assured.

Investigator: Oh.

Doctor: There are also very experienced senior directors above him.

Investigator: Oh, currently, our family is concerned about the technical aspect, so I wanted to ask how many surgeries he could perform in a month or a year. Could it be around 100 to 200 cases in a year? Is that right?
