### **Summary**

1. We have many chief surgeons.
2. Our hospital has quite many kidney supplies.
3. As of now this year more than 600 cases have been done.

### **Investigation Recording**

Investigator: It's the Affiliated Hospital of Guiyang Medical College, right? Is it Transplant? Is it Kidney Transplant?

Nurse: Ah, right.

Investigator: I wanted to contact your hospital, as my family member has uremia, and the doctor recommends a kidney transplant as soon as possible. I'd like to know if there are many people waiting in line at your hospital. Is there a shortage of beds?

Nurse: About 400 or 500 patients.

Investigator: 400 or 500 patients. Who is the surgeon?

Nurse: It depends. We have many doctors.

Investigator: Oh, many doctors.

Nurse: The specific arrangement will be based on surgery.

Investigator: Right. Then which doctor should I schedule an appointment to see?

Nurse: Special clinic for transplant.

Investigator: Oh...special...oh.

Nurse: After registration, you have to be admitted to the hospital for examination. After the examination, you have to wait in line for surgery.

Investigator: Oh, that's how it works. Okay, that means...your hospital has quite a lot of kidney...kidney supplies, right?

Nurse: Right.

Investigator: Okay, tell me then, how many surgeries can the hospital do in a month? So that I will have confidence about the skills.

Nurse: It's uncertain about the specifics, all depend on kidney supplies.

Investigator: How many at most? If there are a lot, your skills must be very good, then I will wait, wait to go to your hospital.

Nurse: As of now we should have done more than 600 cases.

Investigator: That's for one year, right? Or is it one month?

Nurse: As of now, more or less. It is impossible to do over 600 cases a month.

Investigator: One year.

Nurse: So you do it this way...this way: if you want to come over for blood matching, you should register at the transplantation department and come to the clinic for examination.

Investigator: Okay, good. Thank you very much. Alright.

Nurse: Eh, eh.

Investigator: Okay, thank you!

Nurse: Eh.

Investigator: Bye!

Nurse: No problem.
